

5+ YEAR LIFE HIGH INTENSITY UNIFORM WHITE LIGHT OUTPUT. MAINTENANCE-FREE!

# HYLED SERIES LED Process Lighting Systems

HOW IT WORKS

The HYLED 80 lights are designed to illuminate pressurized, irradiated or isolated areas. The HYL lighting package provides a compact, cost effective lighting system. Our patented design allows for an intense beam of light to cross the pressure/process boundary. Once across, the beam is diffused to provide a conical light output of bright, even illumination. The HYL light can mate with a variety of couplings, including flanged, sanitary and NPT connections.

## FEATURES

- Pressure rating from full vacuum to 10,000 PSI available. Consult factory.
- NEMA 4, IP 66 ratings available.
- Brighter than former 80W Halogen lights
- Low power consumption, 16-20W
- Explosion proof Class I, Div. 1, Groups B, C and D, Class II, Div. 1, Groups E, F and G, and NEMA 4 models.
- Flame proof Ex II 2 GD, Eex d IIC T6 and IP 66 models.
- Maintenance-free, high output LED.
- All wiring and maintenance external.

## **APPLICATIONS**

- Process Vessels and Equipment
- Pressure Vessels
- Sterilizers
- **Diving Decompression Chambers**
- Altitude and Environmental Chambers
- Many, many more

## **SPECIFICATIONS**

- Light Pipe Pressure: Full Vacuum to 10,000 PSI available. Consult factory. 1" NPT, flanged and sanitary Mounting: models available
- Light Source Rating: WP, IP 66, EXP and FP available Power Reg: 16-20W
- Typ. Max Tank Specification 25 ft [7.6m] dia. X 70 ft [21.3m] dp. 80W:
- Power Supply 24V - 230V input options available. Options:

## UNIQUE DESIGN

Our patented design consists of three main components: light source, light pipe and driver. A high output, long-life LED array delivers the maximum amount of light into the vessel. Light is guided fiber-optically through the light pipe into the process or pressure area. All Canty light pipes feature our high pressure, high temperature fused glass seal for maximum safety. A variety of couplings are available.
