FUSEVIEWCF™ CONDENSATION-FREE TRI-CLAMP® SIGHT GLASS

THE CANTY ADVANTAGE

J.M. Canty FuseViewCF™ sight glasses have been engineered to meet all your hygienic process and safety needs. FuseViewCF™ Tri-clamps® are a fused sight glass providing a one-piece, flush mount construction. All standard Tri-clamp® FuseViewCFs™ were designed and tested to ensure the safest product available. Canty can provide certification of material and testing if required, typical of ASME code requirements for process vessels. Canty FuseViewCF™ sight glasses are designed in strict compliance to the ASME BPE standard.

UNMATCHED SAFETY, RELIABLE

Canty sight glasses feature the FuseView™ window. Our unique fused glass windows far exceed all conventional tempered glass windows in safety and performance. By fusing glass to metal, a high pressure, high safety, hermetic seal is formed. What's more, our windows can easily be removed for cleaning. Canty windows do not have to be discarded, as do traditional tempered glass windows. The FuseViewCF™ features an integral heater designed to prevent and eliminate condensation. With the FuseViewCF™ you can be assured that your view will not be impeded by fog or vapor.
